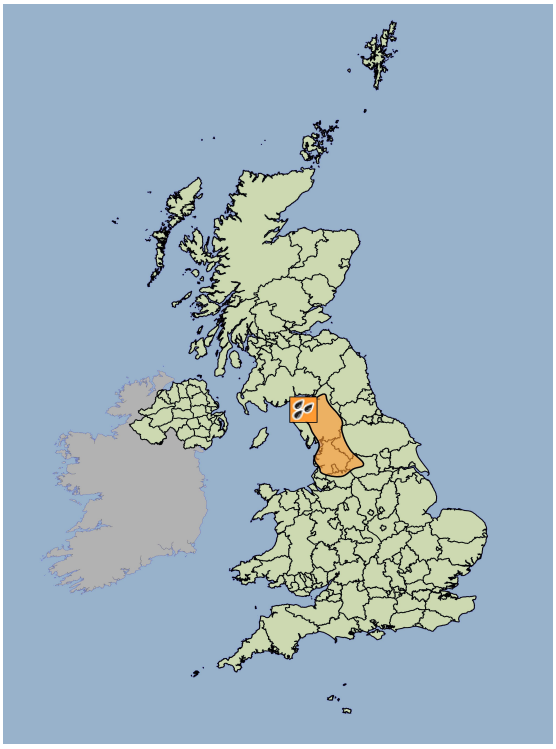
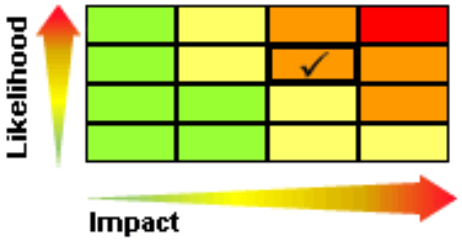
National Severe Weather Warning Service





Chief Forecasters Assessment
Rain, persistent and heavy at times, is expected to affect parts of northern England through much of Boxing Day. A further 60 to 80 mm of rain is likely quite widely, and perhaps 120 mm possible over the most exposed sites. Given current sensitivities, these rainfall amounts are likely to trigger some medium impacts, and some localised severe impacts across parts of Lancashire.

This warning will be kept under review - please keep up to date with the latest forecasts.

The Met Office have issued an **Amber Warning** of **Rain**

Valid from **07:00 on Sat, 26th Dec 2015** until **23:45 on Sat, 26th Dec 2015**

Rain will continue across parts of northern England through much of Boxing Day.

Be prepared for disruption due to river and surface water flooding. This is a further update, to adjust the boundary further south, into the north of Greater Manchester, and also eastwards towards Leeds.

The rain is expected to clear away towards the southeast by the early hours of Sunday.
